# Stock-Flow-Consistent (SFC) Workshop

29-30 October 2022 (Online)

## Proudly hosted by the Centre for International Trade and Business in Asia (CITBA) at JCU- Australia

Stock-Flow-Consistent (SFC) Workshop is a free advanced training workshop that will build a foundation for understanding stock-flow models and policy implementation using standard economic models. The workshop is designed to introduce participants to basic tools of theory building. Practical examples of SFC models from Monetary Economics by W. Godley and M. Lavoie (2007) will be used to enable participants to work with the actual SFC models. The workshop will provide focused discussions around key national-level public and monetary policy elements.
